## Mastering SVG Arcs

by hello@smashingmagazine.com (Akshay Gupta) / 5d

So, I love drawing birds with code. Inspired by my brother's love for birdwatching, I admire the uniqueness of their feathers, colors, and sounds. But what I notice most is the way their bodies curve and different birds can...

## The Importance Of Graceful Degradation In Accessible Interface Design

by hello@smashingmagazine.com (Eleanor Hecks) / 9d

Graceful degradation is a design approach that ensures the basics of a website will still function even if specific individual parts of it stop working. The approach removes single points of failure : just because one thing stops...

## Radio button vs. checkbox: What's the difference and which to use when?

by Chidera Nwankwagu / 1d

Radio buttons and checkboxes are very likely involved when you're designing input controls for forms, e-commerce filters, or payment methods. They might look simple but can make or break the user experience. So, what's the deal...

## Implementing infinite scroll in React with React Snap Carousel

by David Omotayo / 1d

Carousels are a great way of preserving space in a user interface. They let you render a list of content that would essentially take up a significant portion of the user interface in a scrollable container, either vertically or horizontally...

## Using the power and interest grid for stakeholder management

by Bart Krawczyk / 1d

Product management is, in reality, all about stakeholder management. However, buy-in from the right stakeholders only happens when you have the right resources and support. Contrarily, if key stakeholders disagree with yo...
